

BEEFAUSTRALIA

Full-day Tour

Tingle Hill

Tuesday, May 4

Your Hosts, John and Jess Bidgood welcome you to "Tingle Hill", Baralaba for a full day tour which will showcase the management of the family's organic grazing and trading operation.

The Bidgood's vision is to run a profitable organic beef enterprise that rejuvenates the environment and improves soil health. They strive to leave the land they are custodians for in better shape than they found it for the next generation and to teach them the importance of a healthy environment.

The Bidgood's are focused on soil health and are using cell grazing to improve the ground cover and diversity of species. They are consistently looking for ways to improve their soil functions, with a focus now on what is below the ground to improve all ecosystem services.

John and Jess strongly believe that healthy soil makes healthy plants, which makes healthy animals and therefore healthy happy humans. They are focused on the big picture and the role agriculture can play in healing the landscape and improving human health.

Founder of RCS - Terry McCosker will be the guest speaker and will talk about:

- The principles of grazing and business management, focusing on how we can regenerate an ecosystem whilst running a profitable beef enterprise.
- Look at tools we can use to improve our soil health, draw down carbon and build biodiversity above and below the ground.
- Shed light on the research and benefits of inoculating seed with Johnson-Su compost before planting.

John and Jess will be showing how they use MaiaGazing to track, plan and forecast their grazing, and demonstrate how they turn this data into meaningful information that they make stocking rate decisions with.

Following lunch, the Bidgood's will host a Q and A session and wrap up prior to guests departing for the Rockhampton Showgrounds at 2.30pm.

Itinerary

- 7.15 am** for 7.30am Coach Transfer Departing Rockhampton Showgrounds
- 9.30 am** Welcome & Morning Tea
- 10.00am** Presentations by RCS Founder Terry McCosker on principles of grazing & business management, soil health, draw down carbon, build biodiversity, Johnson-Su compost before planting. Paddock tour of multispecies planting & cell design for grazing management. Presentation on the use of MaiaGazing
- 12.00pm** Lunch
- 2.30pm** Q&A and Wrap Up
- 4.30pm** Coach Departs Tingle Hill Arrive Rockhampton Showgrounds
